

## **Hillshire Farms & Dane Packaging International (dPi) Partners in Innovation**

Hillshire Farms (Sara Lee) wanted a problem-solving partner – and found us. When the Hillshire Farm brand needed a special package for a groundbreaking new product concept, they partnered with dPi. They knew of our quality lines and ability so solve problems through innovation.

In Hillshire Farms case, the innovation was through a leading thermoformers proprietary Tamper-Resistant packaging. Strong, crystal clear, resealable and made from PETE (the world's most recycled plastic). It has a patent pending closure that keeps multiple salad components secure and fresh. Hillshire Farm's reaction? Case closed. And locked.

Make us your partner in Innovation.

DPI is a TOTAL PACKAGING SOLUTIONS COMPANY specializing in plastic food packaging. dPi has offices in Illinois and Michigan and covers the Midwest regions of the US.
